

Baltic Entrepreneurship Laboratories (BELT)

Programme Priority: P1 Competitive economy

Programme Specific Objective: 1.1. New Central Baltic knowledge intensive companies

Sub-programme: Central Baltic

Duration: 01.10.2015 - 30.09.2018

Total funding: 1.101.851 EUR

ERDF funding: 843.907 EUR ERDF

Project Summary:

The BELT project creates new joint Central Baltic companies and cooperation between start-ups in the Central Baltic region. The project develops joint and cooperating business opportunities under the theme of “Smart City”, which is a priority at the EU-level and many regional innovation policies to support cross-sectoral smart innovations.

BELT strives to attract entrepreneurship-oriented, already experienced and talented students as well as potential start-ups to the project incubator activities through relevant networks, platforms and university road shows in the partner locations. BELT organizes joint business development BootCamps and coaching for students and start-ups to develop and commercialize their business ideas and to look for additional team members across borders. Additionally, a coaching network will be created to offer business coaching for the established joint teams and best co-operating business ideas from the BootCamps to help them find seed funding for their businesses.

The project will result in at least 5 joint and 10 co-operating knowledge intensive enterprises. The project will support 30 new knowledge intensive enterprises in the Central Baltic region.
