

iSEE - innovating Social Entrepreneurship Education (iSEE)

Programme Priority: P4 Skilled and socially inclusive region

Programme Specific Objective: 4.2. More aligned vocational education and training (VET) programmes in the Central Baltic region

Sub-programme: Central Baltic

Duration: 01.02.2020 - 31.12.2022

Total funding: 607.167 EUR

ERDF funding: 474.875 EUR ERDF

Project Summary:

The involvement in Social Entrepreneurship (SE) is at a low level with less than 1% of the business population undertaking such activities. In order to boost social entrepreneurship an education programme developed collaboratively with companies is needed.

The objective of the project is to innovate aligned professional, higher education in social entrepreneurship in Degree Programmes in four CB area countries. We will develop entrepreneurship education, as well as create SE training for companies' continuing education. The aim is to strengthen the role of social entrepreneurship within the CB area in the long run by developing an in-depth understanding of the state-of-the art of SE via company surveys: know-how of challenges and needs of SE in CB area.

As a result, the project will innovate SE learning materials: it will provide a new theory of SE and practical case studies aimed at ensuring the alignment of the curricula with society, and will develop a training module for companies.

iSEE project innovated social entrepreneurship education

The project iSEE focused on developing study course about social entrepreneurship. The project resulted in 12 ECTS course which is targeted for students, and finetuned for the needs of entrepreneurs.

To be able to create a need-based study course, the project collected information and data about social entrepreneurship from EU reports, and academic literature, and interviewed social enterprises and social enterprise organizations. Partners benchmarked social enterprises and ecosystem of social enterprises to create learning materials, to describe how they combine economic activities and social mission and how they define success. Lessons learned were put in practise during the intensive study week i.e., students from partner institutions (LAB University of Applied, University of Tartu, Riga Technical University and KTH Royal Institute of Technology) worked together with social entrepreneurship cases and topics and got familiar with the opportunities that social entrepreneurship could offer.

The developed course “Social Entrepreneurship and social impact” contains the following parts:

- Sustainability in social enterprises
- Social business Modeling
- Global Ecosystem, Sectoral Ecosystems, Dynamic View
- CSR and social entrepreneurship
