

## Safety and Hygiene - safer environment (SAFHY)

Programme Priority: P4 Skilled and socially inclusive region

Programme Specific Objective: 4.2. More aligned vocational education and training (VET) programmes in the Central Baltic region

Sub-programme: Southern Finland - Estonia

Duration: 01.09.2015 - 31.12.2017

Total funding: 1.184.999 EUR

ERDF funding: 921.249 EUR ERDF

Project Summary:

The project SAFHY aims at developing labour skills of cleaning service and health care services in Estonia and Finland by aligning curricula and training material both for vocational education as well as the labour market. The project promotes learning and professional skills in these two sectors to reduce hygiene risks and infections while increasing safer environments in health care and cleaning services.

Health care and hygienic cleaning together is one of the highest topic in the whole world and its importance is increasing because of Ebola-type infections. The project promotes using digital network solutions for developing skills and avoiding global diffusion of these diseases. In practice the project improves two curricula and training methods for vocational education. The project also designs and implements pilot education to health care and cleaning services by using digital learning platform.

As a result of the project aligns and enriches two curricula and produces cross-border multilingual digital learning material for students both in cleaning services and health care. Digital learning material improves students' skills considering hygiene and safer work environments as well as language skills. It also improves their competencies to enter the profession of their choice. Digital Learning material gives multilingual support for learners and teachers and even more for working leaders and workers. Development of working and language skills and also those better matching working opportunities have strong impact on increasing social inclusion.

Project result in category - Aligned vocational education and training programme

## Aligned curriculum and training material about skills of cleaning service and health care services in Estonia and Finland

The SAFHY project compared and aligned two vocational education and training curricula from the hygiene point of view.

In the field of cleaning services, two modules of the curriculum for Cleaning supervisor in Estonia were aligned with the modules of study programme Specialization in Cleaning Service /Site Facilities Operative in Finland.

To align the hygiene aspects in nursing and health care curricula in both countries, selected modules concerning care procedures in the curriculum of Care worker (EST) were aligned with the modules in curriculum for Practical nurse (FIN).

Project developed significant amount of digital learning materials for cleaning and healthcare specialities on the subject of hygiene. Learning materials can be used in Finnish, Estonian, English and Russian in order to support the learning of different groups of students. Digital learning materials include 21 topics for the health care sector, 27 topics for the cleaning sector, 5900 photos, 120 videos in 4 languages. The material contains text, learning tests, videos, photos and a professional vocabulary. Digital learning material was developed for VET institutions and work places.
