

Social inclusion of older people through volunteering in Estonia, Latvia and Finland (Let us be active!)

Programme Priority: P4 Skilled and socially inclusive region

Programme Specific Objective: 4.1. More people benefiting from stronger Central Baltic communities

Sub-programme: Central Baltic

Duration: 01.05.2015 - 28.02.2017

Total funding: 264.007 EUR

ERDF funding: 208.054 EUR ERDF

Project Summary:

The project 'Let us be active!' aims at decreasing social exclusion and loneliness among older people in Estonia, Finland and Latvia through involving them in voluntary work. The problem is accurate as the population of people in retirement age is growing and loneliness influences negatively their overall health and wellbeing. The idea is to develop a programme that will allow older people to stay active and participate in their communities by doing voluntary work.

The project will analyse existing activities available for seniors, examine their needs in the area of volunteering and produce guidelines for social and health care workers to promote and support voluntarism of the older people. Workshops, meetings and events for seniors, health care workers and social workers will be organized to develop the new form of voluntary activities. At the same time, the information platform in each city will be established and is to be managed by seniors themselves. The experts from the World Health Organization support the project implementation.

As a result of the project social inclusion of older people is expected to improve. The project activities will contribute to the improvement of the health and well-being of older people and their communities. It is expected that at least 100 older people and their families in every municipality will be influenced by the results of the project. Ultimately, the project will strengthen and support the resilience of the communities in the Baltic Sea Region, contributing to the programme's objective.

Project result in category - Improved community

Let Us Be Active! improved the community of elderly in Estonia, Finland and Latvia

Let Us Be Active! improved the community of elderly in three cities: Pärnu in Estonia, Turku in Finland and Riga in Latvia.

The project empowered seniors through a participatory approach and made volunteering options visible, for example at the call center in Riga or through the Tripfriend activity in Turku. The elderly got an opportunity to be socially active, do something meaningful, find fulfillment, find an activity that fits them best and establish friendship. In Pärnu a website on volunteering made activities available for seniors.

The project also changed the procedures and routines for professionals. They got a deeper awareness of senior volunteering and options that can be recommended to seniors. The guidelines for social workers on volunteering are available online in four languages, and the city administration in the partner cities have decided to continue managing the services after the project's end.

The project succeeded to involve three times more participating seniors ($300 > 862$) and social workers/health care professionals ($105 > 384$) than expected.
